We have found an error in Eq. (4) of the original article.<sup>1</sup> Specifically, it is in the definition of the variable  $\omega_H$ , which should contain the vacuum permeability  $\mu_0$  as a factor. The correct definition reads  $\omega_H = \gamma\mu_0 H$ .

The error in the original article was purely typographical and does not affect any of the data or calculations presented in the article.
